Direct Access to Law Enforcement (z)	Weather Net / Weather Usage (wx)	LiTZ System (Ltz)
Specialized Touch-Tone Features (tt)		*List PL Tone in Hz

Do you want this repeater system published in the annual ARRL Repeater Directory? Yes No

Contact me if you have any questions on how to fill out this form. You will receive written notice of the assigned frequency once the coordination process is complete. The repeater must be on the air and fully operational within 3 months after receiving the coordinated pair. The repeater trustee must notify me in writing when the repeater is operational; otherwise I will remove the coordinated frequency and place it back into the available pool of frequencies. The repeater trustee is also responsible for filing an updated coordination form every year, which I must receive before December 1st. If the updated form is not received, the repeater will **NOT** be listed in the annual repeater directory. Additionally, if the updated form is not received by March 1st of each year, the repeater will be deemed off the air and the coordinated frequency will be returned to the available pool of frequencies.
